Subject index

Acetylcholine
Kinetics of the transfer of acetylcholine across the water/nitrobenzene–tetrachloromethane interface. The Gibbs energy of transfer dependence of the standard rate constant (Shao et al.) 415
Ac voltammetry
Optimization of ac voltammetric measurements at ultramicroelectrodes (Baranski) 309
5-Amino-1-naphthol
Formation of a novel electroactive film by electropolymerization of 5-amino-1-naphthol (Ohsaka et al.) 51
Antitumour drugs
Voltammetric behaviour of copper complexes with the antitumour drug 6-mercaptopurine (Bilewicz, Muszalska) 147
Atomic layer epitaxy
Electrochemical atomic layer epitaxy (EC-ALE) (Gregory, Stickney) 543

Band edge shift
Study of reaction coupling and interfacial kinetics at semiconductor electrodes by band edge shift measurements (Allongue et al.) 261
Biogenic amines
Selective complexation of biogenic amines by macrocyclic polyethers at a liquid/liquid interface (Dvořák et al.) 407
Bisulfide-derived species
Structure, composition, thermal stability and electrochemical reactivity of $HS^-_{(aq)}$-derived species chemisorbed at Pd(111) electrode surface (Mebrahtu et al.) 487

Carbon fiber microelectrodes
Ring-modified carbon fiber microelectrodes and multi-micro-electrode devices (Wang et al.) 365
Catalytic electrooxidation
Catalytic electrooxidation of hydrazine at the nickel ferricyanide modified electrode: can an array of surface bound one-electron redox centers act in concert? (Lin, Bocarsly) 325
Ceramic oxides
Components of the measured surface charge of low temperature ceramic oxides (Ardizzone, Bassi) 585
Charged interfaces
Different types of phase transitions at charged interfaces. A thermodynamic analysis (Nikitas) 607
Chronoamperometry
Determination of ultramicroelectrode array dimensions at graphite and one-dimensional organic conductor electrodes using simulations, chronocoulometry and chronoamperometry (Freund, Brajter-Toth) 347
A general approach to the interpretation of electrochemical quartz crystal microbalance data. Part II. Chronoamperometry: temporal resolution of mobile species transport in polyvinylferrocene films (Hillman et al.) 67
Chronocoulometry
Determination of ultramicroelectrode array dimensions at graphite and one-dimensional organic conductor electrodes using simulations, chronocoulometry and chronoamperometry (Freund, Brajter-Toth) 347
Colloidal ruthenium dioxide
The influence of the preparation temperature of colloidal ruthenium dioxide on the photosensitized reduction of H^+ ions (Kleijn, Boschloo) 595
Controlled release
An electron spin resonance (ESR) and simultaneous electrochemical and electron spin resonance (SEESR) spectroscopic study of motion, stability and potential controlled release of radical guests from the β-cyclodextrin inclusion polymer (Petr et al.) 129
Copper
Influence of competing adsorbates on the underpotential deposition of copper on

Pt(111) (White, Abruña) 521
Voltammetric behaviour of copper complexes with the antitumour drug 6-mercaptopurine (Bilewicz, Muszalska) 147
β-Cyclodextrin
An electron spin resonance (ESR) and simultaneous electrochemical and electron spin resonance (SEESR) spectroscopic study of motion, stability and potential controlled release of radical guests from the β-cyclodextrin inclusion polymer (Petr et al.) 129

Dentine
Ac impedance characteristics of human dental enamel and dentine (VanderNoot, Levinkind) 191
Diffusional processes
Limitations in the analysis of ac impedance data with poorly separated faradaic and diffusional processes (VanderNoot) 199

ECALE
Electrochemical atomic layer epitaxy (ECALE) (Gregory, Stickney) 543
Electroactive amphiphiles
Lateral diffusion in organized bilayer assemblies of electroactive amphiphiles. Influence of the oxidation state of the amphiphile investigated by steady-state methods involving an interdigitated micro-electrode array device (Goss, Majda) 377
Electrocatalytic activity
Electrochemical characterization of PANI–Nafion membranes and their electrocatalytic activity (Fabrizio) 23
Electrochemical switching
Simulated fractal formation in electrochemical switching of conducting polymer film into an insulating form on the basis of the propagation theory of the conductive zone (Aoki) 13
Electron tunneling
Surface state assisted electron tunneling through a space charge layer (Nakabayashi, Kira) 249
Electronically conductive polymers
Electrochemical investigations of electronically conductive polymers. Part VI. Mechanism of the redox reactions for the electronically conductive form of polypyrrole (Cai, Martin) 35

Faradaic processes
Limitations in the analysis of ac impedance data with poorly separated faradaic and diffusional processes (VanderNoot) 199
Ferricyanides
Catalytic electrooxidation of hydrazine at the nickel ferricyanide modified electrode: can an array of surface bound one-electron redox centers act in concert? (Lin, Bocarsly) 325
Fractal surfaces
Electrochemistry at fractal surfaces (review) (Pajkossy) 1

Glucose oxidase
Quinone-mediated glucose oxidase electrode with the enzyme immobilised in polypyrrole (Janda, Weber) 119
Gold
An examination of the relationship between surface enhanced Raman scattering (SERS) intensities and surface concentration for pyridine adsorbed at the polycrystalline gold/aqueous solution interface (Stolberg et al.) 563
The impedance behavior of the cell Au/$HClO_4 \cdot 5.5\ H_2O$/Au in the temperature range 4.2–300 K (Cappadonia, Stimming) 235

Human dental enamel
Ac impedance characteristics of human dental enamel and dentine (VanderNoot, Levinkind) 191

Impedance
Ac impedance characteristics of human dental enamel and dentine (VanderNoot, Levinkind) 191
Charge transfer and recombination kinetics at photoelectrodes. A quantitative evaluation of impedance measurements (Schefold, Kühne) 211
Limitations in the analysis of ac impedance data with poorly separated faradaic and diffusional processes (VanderNoot) 199
The impedance behavior of the cell Au/$HClO_4 \cdot 5.5\ H_2O$/Au in the temperature range 4.2–300 K (Cappadonia, Stimming) 235
Interdigitated micro-electrode
Lateral diffusion in organized bilayer assemblies of electroactive amphiphiles. Influence of the oxidation state of the amphiphile investigated by steady-state methods involving an interdigitated micro-electrode array device (Goss, Majda) 377
Ion transfer
Current–potential curves for facilitated ion

transfer across oil/water interfaces in the presence of successive complex formation (Kakiuchi, Senda) 431

Lateral diffusion
Lateral diffusion in organized bilayer assemblies of electroactive amphiphiles. Influence of the oxidation state of the amphiphile investigated by steady-state methods involving an interdigitated micro-electrode array device (Goss, Majda) 377
Layer convolution
Ultrathin layer convolution (Leddy) 295
Low temperature ceramic oxides
Components of the measured surface charge of low temperature ceramic oxides (Ardizzone, Bassi) 585
Low temperature electrochemistry
The impedance behavior of the cell Au/$HClO_4 \cdot 5.5\ H_2O$/Au in the temperature range 4.2–300 K (Cappadonia, Stimming) 235

Macrocyclic polyethers
Selective complexation of biogenic amines by macrocyclic polyethers at a liquid/liquid interface (Dvořák et al.) 407
6-Mercaptopurine
Voltammetric behaviour of copper complexes with the antitumour drug 6-mercaptopurine (Bilewicz, Muszalska) 147
Microelectrodes
Lateral diffusion in organized bilayer assemblies of electroactive amphiphiles. Influence of the oxidation state of the amphiphile investigated by steady-state methods involving an interdigitated micro-electrode array device (Goss, Majda) 377
Ring-modified carbon fiber microelectrodes and multi-micro-electrode devices (Wang et al.) 365
Multi-microelectrode devices
Ring-modified carbon fiber microelectrodes and multi-micro-electrode devices (Wang et al.) 365

NADH dehydrogenase
Electron-transfer from NADH dehydrogenase to polypyrrole and its applicability to electrochemical oxidation of NADH (short communication) (Matsue et al.) 111
Nafion
Electrochemical characterization of PANI–Nafion membranes and their electrocatalytic activity (Fabrizio) 23
Nickel ferricyanide modified electrode
Catalytic electrooxidation of hydrazine at the nickel ferricyanide modified electrode: can an array of surface bound one-electron redox centers act in concert? (Lin, Bocarsly) 325
Nitrobenzene
Kinetics of the transfer of acetylcholine across the water/nitrobenzene–tetrachloromethane interface. The Gibbs energy of transfer dependence of the standard rate constant (Shao et al.) 415
Novel electroactive films
Formation of a novel electroactive film by electropolymerization of 5-amino-1-naphthol (Ohsaka et al.) 51

Oil/water interfaces
Current–potential curves for facilitated ion transfer across oil/water interfaces in the presence of successive complex formation (Kakiuchi, Senda) 431

Palladium
The electrochemical behaviour of irreversibly adsorbed palladium on Pt(111) in acid media (Attard, Bannister) 467
Radiation damage and doping by implantation of Ti or Pd ions into TiO_2 layers on Ti (Wolff et al.) 283
Structure, composition, thermal stability and electrochemical reactivity of $HS^-_{(aq)}$-derived species chemisorbed at Pd(111) electrode surfaces (Mebrahtu et al.) 487
PANI–Nafion membranes
Electrochemical characterization of PANI–Nafion membranes and their electrocatalytic activity (Fabrizio) 23
Perchloric acid
The impedance behavior of the cell Au/$HClO_4 \cdot 5.5\ H_2O$/Au in the temperature range 4.2–300 K (Cappadonia, Stimming) 235
In situ second harmonic generation studies of chemisorption at well-ordered Pt(111) electrodes in perchloric acid solutions (Lynch et al.) 447
Phase transitions
Different types of phase transitions at charged interfaces. A thermodynamic analysis (Nikitas) 607
Photoelectrodes
Charge transfer and recombination kinetics

at photoelectrodes. A quantitative evaluation of impedance measurements (Schefold, Kühne) 211

Platinum
The electrochemical behaviour of irreversibly adsorbed palladium on Pt(111) in acid media (Attard, Bannister) 467
Influence of competing adsorbates on the underpotential deposition of copper on Pt(111) (White, Abruña) 521
In situ second harmonic generation studies of chemisorption at well-ordered Pt(111) electrodes in perchloric acid solution (Lynch et al.) 447

Polycrystalline gold
An examination of the relationship between surface enhanced Raman scattering (SERS) intensities and surface concentration for pyridine adsorbed at the polycrystalline gold/aqueous solution interface (Stolberg et al.) 563

Polyethers
Selective complexation of biogenic amines by macrocyclic polyethers at a liquid/liquid interface (Dvořák et al.) 407

Polypyrrole
Electrochemical investigations of electronically conductive polymers. Part VI. Mechanism of the redox reactions for the electronically conductive form of polypyrrole (Cai, Martin) 35
Electron-transfer from NADH dehydrogenase to polypyrrole and its applicability to electrochemical oxidation of NADH (short communication) (Matsue et al.) 111
Quinone-mediated glucose oxidase electrode with the enzyme immobilised in polypyrrole (Janda, Weber) 119

Polypyrrole films
The growth of polypyrrole films on electrodes (Scharifker et al.) 85

Polyvinylferrocene films
A general approach to the interpretation of electrochemical quartz crystal microbalance data. Part II. Chronoamperometry: temporal resolution of mobile species transport in polyvinylferrocene films (Hillman et al.) 67

Propagation theory
Simulated fractal formation in electrochemical switching of conducting polymer film into an insulating form on the basis of the

Pyridine
An examination of the relationship between surface enhanced Raman scattering (SERS) intensities and surface concentration for pyridine adsorbed at the polycrystalline gold/aqueous solution interface (Stolberg et al.) 563

Pyrrole/*N*-methylpyrrole copolymer
An electrochemical study of pyrrole/*N*-methylpyrrole copolymer (Novák, Vielstich) 99

1,3,5-Triphenylverdazyl free radicals
Reaction entropies for the electrochemical oxidation and reduction of 1,3,5-triphenylverdazyl free radicals in different solvents (Jaworski) 167

Quartz crystal microbalance data
A general approach to the interpretation of electrochemical quartz crystal microbalance data. Part II. Chronoamperometry: temporal resolution of mobile species transport in polyvinylferrocene films (Hillman et al.) 67

Quinone
Quinone-mediated glucose oxidase electrode with the enzyme immobilised in polypyrrole (Janda, Weber) 119

Radiation
Radiation damage and doping by implantation of Ti or Pd ions into TiO_2 layers on Ti (Wolff et al.) 283

Radical guests
An electron spin resonance (ESR) and simultaneous electrochemical and electron spin resonance (SEESR) spectroscopic study of motion, stability and potential controlled release of radical guests from the β-cyclodextrin inclusion polymer (Petr et al.) 129

Radioactive labeling
Voltammetric and radioactive labeling studies of single crystal and polycrystalline rhodium electrodes in sulfate-containing electrolytes (Zelenay et al.) 499

Redox reactions
Electrochemical investigations of electronically conductive polymers. Part VI. Mechanism of the redox reactions for the electronically conductive form of polypyrrole (Cai, Martin) 35

ies of single crystal and polycrystalline rhodium electrodes in sulfate-containing electrolytes (Zelenay et al.) 499

Ring-modified carbon fiber microelectrodes
Ring-modified carbon fiber microelectrodes and multi-micro-electrode devices (Wang et al.) 365

Ruthenium dioxide
The influence of the preparation temperature of colloidal ruthenium dioxide on the photosensitized reduction of H^+ ions (Kleijn, Boschloo) 595

Semiconductor electrodes
Study of reaction coupling and interfacial kinetics at semiconductor electrodes by band edge shift measurements (Allongue et al.) 261

Simultaneous electrochemical and electron spin resonance spectroscopy
An electron spin resonance (ESR) and simultaneous electrochemical and electron spin resonance (SEESR) spectroscopic study of motion, stability and potential controlled release of radical guests from the β-cyclodextrin inclusion polymer (Petr et al.) 129

Space charge layer
Surface state assisted electron tunneling through a space charge layer (Nakabayashi, Kira) 249

Sulfate-containing electrolytes
Voltammetric and radioactive labeling studies of single crystal and polycrystalline rhodium electrodes in sulfate-containing electrolytes (Zelenay et al.) 499

Surface enhanced Raman scattering
An examination of the relationship between surface enhanced Raman scattering (SERS) intensities and surface concentration for pyridine adsorbed at the polycrystalline gold/aqueous solution interface (Stolberg et al.) 563

Tetrachloromethane
Kinetics of the transfer of acetylcholine across the water/nitrobenzene–tetrachloromethane interface. The Gibbs energy of transfer dependence of the standard rate constant (Shao et al.) 415

N-Tetradecyl-*N'*-ethyl-viologen
Spectroelectrochemical and spectrophotochemical properties of *N*-tetradecyl-*N'*-ethyl-viologen (Łapkowski, Szulbiński) 159

Tetrathiafulvalenium tetracyanoquinodimethanide
Some studies of electrode made from single crystals of TTF·TCNQ (Bartlett) 175

Titanium
Radiation damage and doping by implantation of Ti or Pd ions into TiO_2 layers on Ti (Wolff et al.) 283

TTF·TCNQ
Some studies of electrode made from single crystals of TTF·TCNQ (Bartlett) 175

Ultramicroelectrode arrays
Determination of ultramicroelectrode array dimensions at graphite and one-dimensional organic conductor electrodes using simulations, chronocoulometry and chronoamperometry (Freund, Brajter-Toth) 347

Ultramicroelectrodes
Optimization of ac voltammetric measurements at ultramicroelectrodes (Baranski) 309

Ultrathin layer convolution
Ultrathin layer convolution (Leddy) 295

Underpotential deposition
Influence of competing adsorbates on the underpotential deposition of copper on Pt(111) (White, Abruña) 521

Verdazyl free radicals
Reaction entropies for the electrochemical oxidation and reduction of 1,3,5-triphenylverdazyl free radicals in different solvents (Jaworski) 167

Viologens
Spectroelectrochemical and spectrophotochemical properties of *N*-tetradecyl-*N'*-ethyl-viologen (Łapkowski, Szulbiński) 159
